EXPERIENCE

Amazon	Jun. 2024 – Present
<i>Data Scientist (Economist Apprentice)</i>	Seattle, WA
– Developed Surrogate Index Models translating LLM product updates into long-term business impact forecasts – Reduced production model standard error by 6% via bias-injected simulations – Built Causal Discovery framework using Peter-Clark (PC) algorithms and DAG inference to identify structural relationships in high-dimensional observational data – Constructed interactive Agentic Causal Discovery pipeline mapping data inputs to optimal algorithm selection (PC, FCI, GES) via decision rules and LLM reasoning, with human-in-the-loop feedback – Applied Double Machine Learning (DML) to estimate treatment effects under high-dimensional covariate spaces – Designed and executed A/B tests to estimate incremental treatment lift and quantify heterogeneous treatment effects, accounting for multiple testing correction and SUTVA violations – Engineered scalable data pipelines (SQL, Athena, Glue) and automated monthly model runs in AWS via Lambda and SageMaker; built dashboards in QuickSight	
University of Connecticut	Dec. 2019 – Present
<i>Research Technician</i>	Storrs, CT
– Architected a RAG system for graduate-level econometrics coursework – Deployed LLM-based persona agents for survey research – Managed end-to-end data collection, processing, analysis, and reporting for 6+ published research studies – Utilized quasi-experimental designs (DiD, event study, IPTW, IV) to quantify causal impacts on student outcomes – Evaluated heterogeneous treatment effects (HTE) across diverse populations to inform educational policy	
Nichols College & Bryant University	Dec. 2022 – Jul. 2024
<i>Adjunct Professor</i>	Dudley, MA & Smithfield, RI
– Taught Data Science (Python, predictive modeling) and Macroeconomics across two institutions – Supervised undergraduate research team assessing VR intervention impact through pre- and post-surveys	

EDUCATION

Central Connecticut State University , M.S. Data Science	2025
University of Connecticut , M.S. Quantitative Economics	2020
University of Connecticut , B.A. Economics	2019

SELECTED PUBLICATIONS

• Zhao, W., **Patterson, A.**, et al. (2025). From Metrics to Meaning: Estimating User Feedback Using LLM-Based Evaluation. *Amazon Science*. [\[link\]](#)

10+ peer-reviewed publications, 10+ conference presentations. Full list: [Google Scholar](#)

SKILLS

Technical: SQL, Python, R, AWS (Bedrock, S3, Lambda, SageMaker, Athena, Glue, EC2, ECR, Containers, QuickSight), AutoGluon, PowerBI, Tableau, Excel, LangChain, LangGraph

Statistical: Causal Inference, Causal Discovery, Double Machine Learning, Causal Forests, A/B Testing & Experimentation Design, Treatment Effect Estimation, Regression Analysis, Panel Data, Hypothesis Testing, Machine Learning (Supervised/Unsupervised), Deep Learning, Bayesian Hierarchical Modeling, Time Series Analysis

Domain: Econometrics, Data Science, Agentic AI, Large Language Models, Retrieval Augmented Generation, Natural Language Processing, AutoML, Big Data, Data Visualization
