EXPERIENCE

Amazon

Jun. 2024 – Present

Economist Apprentice

Seattle, WA

- Developed Surrogate Index Models to translate LLM updates into forecasts of long-term business impact
- Reduced the standard error of a production model by 6% using bias-injected simulations
- Engineered scalable data pipelines using SQL, Athena, and Glue
- Automated monthly model runs in AWS with Lambda and SageMaker endpoints
- Conducted A/B testing to identify treatment effects, accounting for multiple testing and covariate imbalance
- Applied causal inference and discovery in Python for observational and experimental data; designed reporting in QuickSight

University of Connecticut

Dec. 2019 – Present

Research Technician

Storrs, CT

- Architected a RAG system for graduate-level econometrics coursework; deployed LLM-based persona agents for survey research
- Managed end-to-end data collection, processing, analysis, and reporting for 6+ published research studies
- Utilized quasi-experimental designs (DiD, event study, IPTW, IV) to quantify causal impacts on student outcomes
- Evaluated heterogeneous treatment effects (HTE) across diverse populations to inform educational policy

Nichols College & Bryant University

Dec. 2022 – Jul. 2024

Adjunct Professor

Dudley, MA & Smithfield, RI

- Taught Data Science (Python, predictive modeling) and Macroeconomics across two institutions
- Developed curricula in data management, visualization, and advanced modeling using Excel, PowerBI, and Tableau
- Supervised undergraduate research team assessing VR intervention impact through pre- and post-surveys

EDUCATION

Central Connecticut State University

2025

M.S. Data Science

University of Connecticut

2019, 2020

B.A. Economics; M.S. Quantitative Economics

SELECTED PUBLICATIONS

- Zhao, W., **Patterson, A.**, et al. (2025). From Metrics to Meaning: Estimating User Feedback Using LLM-Based Evaluation. *Amazon Science*.
 - **Patterson, A.** (2025). Assessing the Alignment of FOMC Statements with Minutes using LLMs. *Issues in Information Systems*, 26(2).
 - **Patterson, A.** (2024). Examining Text Consistency Amongst FOMC Statements Using Deep Learning. *Issues in Information Systems*, 25(3).
- 10+ peer-reviewed publications, 10+ conference presentations, Distinguished Paper Awards. Full list: [Google Scholar](#)

SKILLS

Technical: SQL, Python, R, AWS (S3, Lambda, SageMaker, Athena, Glue, Bedrock, QuickSight), AutoGluon, PowerBI, Tableau, Excel

Statistical: Causal Inference, A/B Testing, Regression Analysis, Panel Data, Hypothesis Testing, Machine Learning (Supervised/Unsupervised), Deep Learning, Bayesian Hierarchical Modeling, Time Series Analysis

Domain: Econometrics, Data Science, NLP, LLM, Agentic AI, AutoML, Big Data, Data-Driven Decision Making, Data Visualization
